

**CSE 321– Operating
Systems QUIZ 4**

Spring Semester – 2022

Grade

Full Name (in Block Letter): _____

ID: _____ **Section: 12 Signature:** _____

Marks: 15 points Time: 30 minutes

Instructions: Answer all questions on the space provided below for each.

Question 1: CO6 (6+2 points): Given memory partitions of 1000k, 500k, 210k, 260k, 320k, and 150k (in order, top to bottom), apply first fit, worst fit and best fit algorithms to place processes with the space requirement of 212k, 417k, 112k, and 426k (in order). Which algorithm makes the most effective use of memory?

Answer:

Question 2 CO6 (4 points): Compare advantages and disadvantages between MFT and MVT technique in terms of partitioning main memory?

Answer:

Question 3 CO6 (1.5+1.5 points): If page size is 2KB, then how many frames will be needed in Main memory for process size of 73,506B? Is there any internal fragmentation? - If yes, calculate the value. **Answer:**
